

Hi there, I am **Qizhen (启祯)** 🙋

I am currently a DPhil student in Engineering Science at the [University of Oxford \(Exeter College\)](#), under the supervision of [Prof. Victor Adrian Prisacariu](#) and [Dr. Yangchen Pan](#). I recently completed my MSc in Advanced Computer Science at Oxford, and before that, I obtained my undergraduate degree in Mathematics at the [University of Bristol](#), where I was privileged to conduct ML research under the guidance of [Dr. Song Liu](#).

I'm passionate about building efficient generative methods that can adapt to a variety of scenarios. I envision that effective and stable generative techniques can help us augment reliable synthetic samples to overcome data scarcity challenges.

Research interests: Statistical ML (particularly generative models), Reinforcement Learning

Contact: qizhen.ying@exeter.ox.ac.uk

I am **open to opportunities** and collaborations. If you'd like to work together, please feel free to get in touch!
